
R800

User Manual

Thank you for purchasing the R800C pad!

Preface

Thank you for choosing R800C. The pad is operating on Google Android system. In addition to the general functions, a variety of useful features and services including music playback, camera, sound recording, Bluetooth, WIFI, web browsers, email, etc. In addition, the open Android platform offers abundant applications, adding value to mobile experience to satisfy all kinds of needs.

Security Notifications

Please read these simple guidelines. Non-compliance may be dangerous or illegal. This user manual provides more detailed information on security matters.

Safe Power on: When wireless device or equipment is prohibited or possible to cause interference or danger, do not switch on.

Safe driving: Please obey all traffic rules and regulations. Please drive with both of your hands.

Interference: All wireless devices may be susceptible to interference, which could affect performance.

Switch Off In Hospitals: Please follow the restrictions and switch off near hospitals.

Switch Off In Aircraft: Please follow the restrictions. Wireless devices may cause interference to aircraft.

Switch Off When Refueling: Do not use the device at a refueling point and near fuels or chemicals.

Switch Off Near Explosion: Do not use the device during an explosion process.

-  Follow the documentation and use the product in normal positions. Avoid touching the antenna.

-  Qualified Service: Only qualified personnel may install or repair this equipment.

-  Accessories and batteries: Use only approved accessories and batteries. Do not connect with incompatible products.

-  This device is not waterproof. Please keep it dry.

-  Remember to backup all important information or keep a written record.

-  When connecting to other devices, read user guide for detailed safety instructions. Do not connect incompatible products.

-  Emergency call: ensure there is network available and phone function activated. Press the end button repeatedly to clear the display content and return to standby mode. Enter the emergency number, then press call button and provide your location. Please do not hang up without permission.

Note: The pictures used in the manual only serve as demonstration function and may be different from the actual phone display.

Note:

- **Please connect to network before you open the map.**
- **Some countries and regions maybe unavailable on the map.**

FCC RF Exposure Information and Statement

The SAR limit of USA (FCC) is 1.6 W/kg averaged over one gram of tissue. Device types R800

(FCC ID: WA6R800) has also been tested against this SAR limit. The highest SAR value reported under this standard during product certification when properly worn on the body is 1.42W/kg. This device was tested for typical body-worn operations with the back of the handset kept 1.5cm from the body. To maintain compliance with FCC RF exposure requirements, use accessories that maintain a 1.5cm separation distance between the user's body and the back of the handset. The use of belt clips, holsters and similar accessories

should not contain metallic components in its assembly. The use of accessories that do not satisfy these requirements may not comply with FCC RF exposure requirements, and should be avoided.

FCC WARNING

This device complies with Part 15 of the FCC Rules. Operation is subject to the following two conditions:

- (1) this device may not cause harmful interference, and
- (2) this device must accept any interference received, including interference that may cause undesired operation.

NOTE 1: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

NOTE 2: Any changes or modifications not expressly approved by the manufacturer could void the user's authority to operate the equipment.

NOTE 3: The manufacturer is not responsible for any radio or TV interference caused by

unauthorized modifications to this equipment. Such modifications could void the user's authority to operate the equipment.
