SAMSUNG

Printed in Korea Code No.:GH68-32654A English (EU). 02/2013. Rev. 1.1

- Do not engage in stressful or emotional conversations that may be distracting. Make people you are talking with aware you are driving and suspend conversations that have the potential to divert your attention from the road.
- Use your device to call for help. Dial a local emergency number in the case of fire, traffic accident, or medical emergencies
- Use your device to help others in emergencies. If you see an auto accident, a crime in progress, or a serious emergency where lives are in danger, call a local emergency number.
- Call roadside assistance or a special, non-emergency assistance number when necessary. If you see a broken-down vehicle posing no serious hazard, a broken traffic signal, a minor traffic accident where no one appears injured, or a vehicle you know to be stolen, call roadside assistance or another special, non-emergency number

Proper care and use of your mobile device

Keep your device dry

- · Humidity and all types of liquids may damage device parts or electronic circuits.
- · When wet, remove the battery without turning on your device. Dry your device with a towel and take it to a service centre.
- Liquids will change the colour of the label that indicates water damage inside the device. Water damage to your device can void your manufacturer's warranty.
- Do not use or store your device in dusty, dirty areas

Dust can cause your device to malfunction Do not store your device on slopes

If your device falls, it can be damaged.

Do not store your device in hot or cold areas. Use your device at -20 °C to 50 °C

Your device can explode if left inside a closed vehicle, as the inside temperature can reach up to 80 °C

- Do not expose your device to direct sunlight for extended periods of time (such as on the dashboard of a car) Store the battery at 0 °C to 40 °C.
- and necklaces
- Your device may become deformed or malfunction · If the battery terminals are in contact with metal objects, it may cause
- Your device may malfunction or the battery may discharge from exposure to magnetic fields.
- and boarding passes, may be damaged by magnetic fields. · Do not use carrying cases or accessories with magnetic closures of

Do not store your device near or in heaters, microwaves, hot cooking equipment, or high pressure containers

The battery may leak.

countries with separate battery return systems)

Ensure access to emergency services

Emergency calls from your device may not be possible in some areas or circumstances. Before travelling in remote or undeveloped areas, plan an alternate method of contacting emergency services personnel

Specific Absorption Rate (SAR) certification information

Your device conforms to European Union (EU) standards that limit human exposure to radio frequency (RF) energy emitted by radio and telecommunications equipment. These standards prevent the sale of mobile devices that exceed a maximum exposure level (known as the Specific Absorption Rate, or SAR) of 2.0 W/kg.

During testing, the maximum SAR recorded for this model was 0.426 W/kg. In normal use, the actual SAR is likely to be much lower as the device has been designed to emit only the RF energy necessary to transmit a signal to the nearest base station. By automatically emitting lower levels when possible, your device reduces your overall exposure to RF energy.

The Declaration of Conformity statement at the back of this manual demonstrates your device's compliance with the European Radio & Terminal Telecommunications Equipment (R&TTE) directive. For more information about the SAR and related EU standards, visit the Samsung website

Correct disposal of this product

(Waste Electrical & Electronic Equipment) Applicable in the European Union and other European countries with separate collection systems) ∕₋ð

Electronic devices in a motor vehicle may malfunction due to the radio frequency of your device

Electronic devices in your car may malfunction due to radio frequency of your device. Contact the manufacturer for more information.

Comply with all safety warnings and regulations regarding mobile device usage while operating a vehicle

While driving, safely operating the vehicle is your first responsibility. Never use your mobile device while driving, if it is prohibited by law. For your safety and the safety of others, practice good common sense and remember the following tips:

- · Use a hands-free device.
- · Get to know your device and its convenience features, such as speed dial and redial. These features help you reduce the time needed to place or receive calls on your mobile device.
- · Position your device within easy reach. Be able to access your wireless device without removing your eyes from the road. If you receive an incoming call at an inconvenient time, let your voice mail answer it for you.
- · Let the person you are speaking with know you are driving. Suspend calls in heavy traffic or hazardous weather conditions. Rain, sleet, snow, ice, and heavy traffic can be hazardous.
- Do not take notes or look up phone numbers. Jotting down a "to do" list or flipping through your address book takes attention away from your primary responsibility of driving safely.
- Dial sensibly and assess the traffic. Place calls when you are not moving or before pulling into traffic. Try to plan calls when your car will be stationary. If you need to make a call, dial only a few numbers, check the road and your mirrors, then con

When cleaning your device:

- · Wipe your device or charger with a towel or a rubber · Clean the terminals of the battery with a cotton ball or a towel
- · Do not use chemicals or detergents.
- Do not use the device if the screen is cracked or broken Broken glass or acrylic could cause injury to your hands and face. Take the device to a Samsung Service Centre to have it repaired.

Do not use the device for anything other than its intended use

Avoid disturbing others when using the device in public

Your device is not a toy. Do not allow children to play with it as they

could hurt themselves and others, damage the device, or make calls

· Ensure that any mobile devices or related equipment installed in

· Avoid placing your device and accessories near or in an air bag

Allowing unqualified personnel to service your device may result in damage to your device and will void your manufacturer's warranty.

· Do not remove a card while the device is transferring or accessing

Protect cards from strong shocks, static electricity, and electrical

metal objects. If dirty, wipe the card with a soft cloth.

· Do not touch gold-coloured contacts or terminals with your fingers or
