Safety Guidelines

Please read these simple guidelines. Not following them may be dangerous or illegal.
SAR Information
▢ Your phone is designed not to exceed the limits of emission of radio waves recommended by international guidelines.
▢ SAR (specific absorption rate) is the unit of body-absorbed RF energy when the phone is in use.
▢The Highest SAR value of the handset is 1.39 W/kg @1 gm (head) and 0.688 W/kg @ 1 gm (body).

SAR Recommendations
▢Use a wireless hands-free system (headphone, headset) with a low power Bluetooth emitter.
▢Please keep your calls short and use SMS whenever convenient. This advice applies especially to children, adolescents and pregnant women.
▢ Prefer to use your cell phone when the signal quality is good.
▢ People having active medical implants should preferably keep the cell phone at least 15 cm away from the implant.
Safe Driving
▢ Do not use the phone while driving. When you have to use the phone, please use the personal hands-free kit.
▢Please put the phone safely in the phone stand. Do not put it onto any passenger seat or any place from which it may fall down in case of vehicular collision or emergency braking.
Unsafe Areas
Please turn off your phone when you are close to a gas station or

9

During Flight
▢ Flight is influenced by interference caused by the phone. It is illegal to use a phone on the airplane. Please turn off your phone during a flight.
In Hospitals
▢ Your Phone's radio waves may interfere with the function of inadequately shielded medical devices. Consult a physician or the manufacturer of the medical device to determine whether they are adequately shielded from external RF energy. Switch off your device when regulations posted instruct you to do so.
▢ To avoid potential interference with implanted medical devices such as a pacemaker or cardioverter defibrillator:
▢ Always keep your phone at least 15.3 centimetres (6 inches) from the medical device.
▢ Do not carry the wireless device in a breast pocket.
▢ Turn off the phone if there is any reason to suspect that interference is taking place.
▢ Follow the manufacturer directions for the implanted medical device.
▢ If you have any questions about using your wireless device with a implanted medical device, consult your health care provider.

Taking Care of Your Device
▢Keep the device dry. Precipitation, humidity, and all types of liquids or moisture can contain minerals that will rust electronic circuits. If your device does get wet, remove the battery without turning on the device, wipe it with a dry cloth and take it the service center.

10

▢Do not use or store the device in dusty, dirty areas. Its moving parts and electronic components mey get damaged.
▢ Do not store the device in high or cold temperature. High temperatures can shorten the life of electronic devices and damage batteries.
▢Do not attempt to open the device other than as instructed in this guide. Repairing this phone by yourself other than our authorized service agents/centers goes against the warranty rules.
▢Do not drop, knock, or shake the device. Rough handling can break internal circuit boards and fine mechanics.
▢ Do not use harsh chemicals, cleaning solvents, or strong detergents to clean the device. Only use a soft, clean, dry cloth to clean the surface of the device.
▢Do not store your device near magnetic fields or allow your device to come in contact with magnetic fields for extended period of time.
▢Use manufacturer approved batteries, chargers, accessories and supplies. Micromax will not be held responsible for user's safety when using unapproved accessories or supplies.
