	Switch off when instructed in aircrafts and airports
	Only use approved accessories
	Switch off in explosive environments
	Do not rely on this device for emergency communications

Getting to Know Your Phone

Headset Jack — Receiver

Photoreceptor — Front camera

Volume Keys — Power Key

Touch Screen

Home Key

Back Key — Menu Key

Charger/USB Jack

Rear Camera — Flash

Back Cover

Speaker
Power Key

- Hold to turn on or off Silent or vibrate or Airplane mode, or to power off or Reboot Device.
- Press to switch your phone to Sleep mode.
- Press to wake up your phone.

Home Key

- Press to return to the Home Screen from any application or screen.
- Hold to see Google search.

Menu Key

- Press to get the options for the current screen.
- Hold to see recently used applications.

Back Key

- Press to go to the previous screen.

Volume Up/Volume Down

- Press or hold to turn the volume up or down.

Before Getting Started

1. Removing the Back Cover

2. Installing the SIM Card
Notes:

- Switch off your phone before installing or replacing the SIM card.
- If you're using a small card, please use the SIM card dedicated card sets, and then the whole into the slot Normal use.
- Please buy standardization SIM dedicated card sets from the formal channels，otherwise the slot shrapnel may be pulled off when taking cards.

3. Installing the microSD Card
Notes: Some applications may require a microSD card to work normally or may store certain data on it. Therefore, it is recommended that you keep a microSD card installed and not remove or replace it randomly.

4. Charging the Battery
When you first get your new phone you'll need to charge the battery like this:
1. Connect the adapter to the charging jack.
2. Connect the charger to a standard AC power outlet.
3. Disconnect the charger when the battery is fully charged.

Notes:

- If excessive discharge of the battery, the charging icon will display delay.
- If the battery is extremely low, you may be unable to power on the phone even when it is being charged. In this case, try again after charging the phone for at least 10 minutes. Contact customer service if you still cannot power on the phone after prolonged charging.

CAUTION: Do not change the built-in rechargeable battery in your phone by yourself. The battery can only be changed by ZTE or ZTE authorised service provider.

Powering On/Off Your Phone

Make sure the battery is charged before powering on.

- Press and hold the **Power Key** to turn on your phone.
- To turn it off, press and hold the **Power Key** to open the options menu. Touch **Power off** > **OK**.

Waking Up Your Phone

1. Press the **Power Key** to activate your screen display.

2. Touch and hold at the center of the screen.

NOTE:
If you have set an 'unlock pattern', or a PIN/password for your phone, you'll need to draw the pattern or enter the PIN/password to unlock your screen.

Using the Touch Screen

Your phone's touch screen lets you control actions through a variety of touch gestures.

- Touch
  When you want to type using the onscreen keyboard, select items onscreen such as application and settings icons, or press onscreen buttons, simply touch them with your finger.

- Touch and Hold
  To open the available options for an item (for example, a message or link in a Web page), touch and hold the item.

- Swipe or Slide
  To swipe or slide means to quickly drag your finger vertically or horizontally across the screen.

- Drag
  To drag, press and hold your finger with some pressure before you start to move your finger. While dragging, do not release your finger until you have reached the target position.

- Pinch
  In some apps (such as Maps, Browser, and Gallery), you can zoom in and out by placing two fingers on the screen at once and pinching them together (to zoom out) or spreading them apart (to zoom in).

- Rotate the screen
  For most screens, you can automatically change the screen orientation from portrait to landscape by turning the phone sideways.

Declaration of RoHS Compliance

To minimize the environmental impacts and take more responsibilities to the earth we live on, this document shall serve as a formal declaration that the ZTE Blade L2 manufactured by ZTE CORPORATION is in compliance with the Directive 2011/65/EU of the European Parliament - RoHS (Restriction of Hazardous Substances) with respect to the following substances:

1. Lead (Pb)
2. Mercury (Hg)
3. Cadmium (Cd)
4. Hexavalent Chromium (Cr (VI))
5. Polybrominated biphenyls (PBBs)
6. Polybrominated diphenyl ethers (PBDEs)

The ZTE Blade L2 manufactured by ZTE CORPORATION meets the requirements of EU 2011/65/EU.

Disposal of Your Old Appliance

	1. When this crossed-out wheeled bin symbol is attached to a product, it means the product is covered by the European Directive 2012/19/EU. 2. All electrical and electronic products should be disposed of separately from the municipal waste stream via designated collection facilities appointed by the government or the local authorities. 3. The correct disposal of your old appliance will help prevent potential negative consequences for the environment and human health.

For this product's recycling information based on WEEE directive, please send an e-mail to weee@zte.com.cn

SAR

Your mobile device is a radio transmitter and receiver. It is designed not to exceed the limits for exposure to radio waves recommended by international guidelines. These guidelines were developed by the independent scientific organization ICNIRP and include safety margins designed to assure the protection of all persons, regardless of age and health.

The guidelines use a unit of measurement known as Specific Absorption Rate, or SAR. The SAR limit for mobile devices is 2 W/kg and the highest SAR value for this device when tested was 0.365W/Kg. As mobile devices offer a range of functions, they can be used in other positions, such as on the body.

As SAR is measured utilizing the device's highest transmitting power, the actual SAR of this device while operating is typically below that indicated above. This is due to automatic changes to the power level of the device to ensure it only uses the minimum power required to communicate with the network.

This equipment may be operated in:				AT	BE
