AT&T Network Notifications

Your 4G LTE wireless device will display one of the following network indicators to let you know which of AT&T's wireless networks you are connected to. A network indicator does not necessarily mean that you will experience any particular upload or download data speeds. Actual speeds depend upon a variety of factors, including the device, network utilization, file characteristics, terrain, etc.

📶 Connected to AT&T's 4G LTE network.

📶 Connected to AT&T's HSPA+ network. AT&T's HSPA+ network is capable of delivering 4G speeds when combined with enhanced backhaul. Your wireless device cannot distinguish between HSPA+ cell sites combined with enhanced backhaul and those without enhanced backhaul. Enhanced backhaul is available in limited areas. However, availability is increasing with ongoing backhaul deployment. Learn more at **att.com/network**
