Please apply to your operator f card. The PUK2 code is unmodifiable. If yo please contact your service provider.

12.4 Cautions for battery cha

The phone provides power by using a battery. The standby time and call time influenced by the system's environment ar settings.

e use the approved battery and charger nated for this product. The company will no responsibility for damage caused by horized battery or charger.

battery icon will start scrolling when the e is charged in power-on-state.

Caution:
here is no battery left at all, then the y icon will appear after 2-3 minutes of ing. The battery charging time depends e status of the phone (whether switched aking a call), usually, it will take about ours.
make the new battery achieve its best city, please charge and discharge the e for twice or three times. Please charge ew battery over 10 hours for the first al times.

use wet hands to touch the battery or er while charging in order to avoid danger.

ot to use the phone while charging.

attery icon stops scrolling while the battery , and then you can disconnect the phone he charger adapter.

12.5 Cautions for battery us

The battery usage depends on the netw setting and usage situation. Take L battery of 1500 mill amperes capac example, it allows calling time up to three-SIM standby time as 350-5(Dual-SIM standby time as 400-550 hou single-SIM standby time as 450-550 hou

- Never use any damaged battery.
- The phone will consume a little power network station. Therefore, the call a time depends greatly on the signal honeycomb network and the parame network operator.
- The battery charging time lies on th power, and the type of the battery a When the operation time (talk time a time) is noticeably shorter than norma to replace with a new battery.
- Only use batteries and charges autl this device, otherwise, explosion caused. Please disconnect the cha unused. Do not leave the battery con charger over one week, for overcha shorten the life length.

connect the anode and cathode of a inversely.

leave the battery in places with over-high -low temperature, otherwise, the battery y will be reduced and battery life will be ied. Always try to keep the battery in emperature.

t short-circuit the battery. This may e the electronic core or internal protected If you keep the unused battery in the or bags, metal objects (eg. coin, clip or c) inside might have the anode directly ed with the cathode of the battery and accidental short circuit. Therefore, carefully and separately store the

burn your phone battery or treat it as n rubbish. Please adhere to the local mental policy in order to avoid lering life and causing environmental e, and recycle your batteries in time.

phone, battery or other charging device is ntally penetrated by water, you must not side any calefaction equipment (such as icrowave oven etc.) to dry it. The phone r products may go wrong, and may even cause the phone, battery or other device to burn, expand and explode.

- Please deal with the discarded according to the relative introduction.

The company will take no responsibility direct or indirect damage caused by user

12.6 Cautions for spare usage

- Please put all spare parts (such as S storage card, battery etc) out of reach of in case danger occurs.
- Please do switch off the phone and ur phone and charger before you remo battery from the phone.
- As the phone's spare parts are not wa please keep all spare parts dry.
- You should pull out the plug of any sp correctly when you switch off the pow drag the power line forcibly.

If the phone, battery, and charger don't normally, please contact closest maintenance centres timely.

)ther safety information

don't use your phone, it's better to switch and remove the battery so as to save y and avoid cellular radiation.

e don't have the volume over loud while the phone, which might impair your ng.

unprofessional shouldn't disassemble the nal and battery of the phone.

ecommended that you should try not to use olster with magnet button, for the magnet interfere with the phone signal, and hard utton may crush the LCD screen. Plastic e cover will lead to poor volatilization of and have the internal components oted, moreover, it can have the phone oxidized and faded.

u or your family has a medical record of ess or epilepsy, please consult with the r first, if you want to play phone games or ne flashlight (the flash doesn't available in one models)

e don't put the flashlight too close to the of human beings or animals, as this could rm to the eyes.

- Should avoid the phone falling off places.
